Summary: LATE FILED. On June 27, 2001, Kirsten Stacey, Manager, Low-Income Energy Management of Pacific Gas and Electric Company (PG&E), had a telephone conversation with Linda Serizawa, advisor to Cmmr. Wood. Stacey stated that ALJ Gottstein's proposed decision would best serve low-income customers by allowing PG&E to recover incremental CARE administrative costs through the balancing account. Stacey stated that the proposal to allow PG&E to recover administrative costs through the \$4.5 million SBXI-5 outreach monies could reduce the amount allocated to PG&E's CARE outreach program by 50 percent. Stacey explained that PG&E's 2001 incremental administrative costs have been significantly higher. Stacey stated that PG&E had hoped to use the 4.5 million to achieve a 70 percent penetration rate of eligible customers enrolled on the CARE program.

07/10/01	A00-06-032	Southern California Gas Company, for authority to implement a rate for peaking service as ordered by D.00-04-060
----------	------------	--

Summary: On July 6, 2001, Leslie Katz, Regional Vice President of Regulatory Affairs for Sempra Energy (Sempra), met with Laura Krannawitter, advisor to Cmmr. Duque, in San Francisco. Also present were: Claudine Swartz, Regulatory and Governmental Affairs Manager, and Steve Rahon, Regulatory Case Manager, for Sempra, and Allison Smith, Senior Market Analyst for Southern California Gas Company (SoCalGas). Written materials (attached to the notice) were used. Katz stated that Sempra supports the policy direction in the proposed decision (PD) but suggested that the Commission reflect SoCalGas' rate design proposal to capture customer elected firm capacity requirements. Swartz stated that Sempra does not support the alternate. Swartz stated that the rate methodology in the alternate assumes that costs related to providing peak service are incurred only on the coincident peak day when, in fact, SoCalGas incurs system costs every day to provide peak service. Rahon explained that the PD embraces a rate methodology that may result in customers paying the tariff rate for peaking service. Rahon recommended that the Commission adopt SoCalGas' proposal or, at a minimum, the Office of Ratepayer Advocates' proposal that assesses a demand charge based on the highest monthly usage in the previous twelve months, but establish a floor rate of 125 percent of the all-volumetric tariff. Rahon explained that the rate design proposed by Watson Cogeneration would likely fall below the all-volumetric tariff rate. Smith noted that SoCalGas has competed fairly with interstate pipelines based on price, as its electric generation rate has decreased since 1998. Smith stated that the RLS tariff has not had an effect on the pipeline capacity to California. Katz stated that the peaking service decision is not the forum to resolve concerns about gas intrastate transmission capacity.

Summary: On July 6, 2001, Leslie Katz, Regional Vice President of Regulatory Affairs for Sempra Energy (Sempra), met with Cmmr. Brown in San Francisco. Also present were: Belinda Gatti, advisor to Cmmr. Brown, Claudine Swartz, Regulatory and Governmental Affairs Manager of Sempra, and Lee Stewart, President of Energy Transportation Services, and Rick Morrow, Vice President of Customer Service and Marketing, for Southern California Gas Company (SoCalGas). Written materials (attached to the notice) were used. Katz stated that Sempra supports the policy direction in the proposed decision (PD) but suggested that the Commission reflect SoCalGas' rate design proposal to capture customer elected firm capacity requirements. Morrow stated that Sempra does not support the alternate. Morrow stated that the rate methodology in the alternate assumes that costs related to providing peak service are incurred only on the coincident peak day when, in fact, SoCalGas incurs system costs every day to provide peak service. 07/12/01 A01-06-020 Pacific Gas and Electric Company, for Approval of
Open Season Procedures for Awarding Firm Capacity
on its Transmission Facilities

Summary: On July 8, 2001, Les Guliasi, Director of Regulatory Relations of Pacific Gas and Electric Company (PG&E), met with Belinda Gatti, advisor to Cmmr. Brown, in San Francisco. Also present was David Gamson, advisor to Cmmr. Brown, and Brian Cherry, Manager of Regulatory Relations, for PG&E. Guliasi stated that approval of the Open Season would provide customers an alternative to taking service from a bypass interstate pipeline. Cherry stated that approving the Open Season would allow generators to align their upstream interstate capacity commitments with their downstream intrastate capacity commitments. Cherry explained that aligning both upstream and downstream transportation allows generators an increased ability to hedge risk and engage in forward electric contracting. Cherry also stated that a key feature of the Open Season was to seek market input for expanding PG&E's intrastate pipeline system by 200 MMcf by January 1, 2003.

Summary: On July 9, 2001, Brian Cherry, Manager of Regulatory Relations of Pacific Gas and Electric Company (PG&E), met with Belinda Gatti, advisor to Cmmr. Brown, in San Francisco. Cherry suggested that the language in the proposed decision (PD) should be broadened to state that any intrastate capacity not utilized by shippers should be made available and sold as interruptible capacity by PG&E. Cherry suggested that broadening the language would prevent shippers from withholding awarded capacity to artificially increase prices.

07/13/01 A00-06-032 Southern California Gas Company, for authority to
implement a rate for peaking service as ordered by
D.00-04-060

Summary: AUGMENTATION REQUIRED. On July 10, 2001, Mark Pocta of the Office of Ratepayer Advocates (ORA) participated in two separate all-party meetings: with Cmmr. Wood and with Cmmr. Duque in San Francisco. At the meeting with Cmmr. Wood also present was Steven Weissman, advisor to Cmmr. Wood, and at the meeting with Cmmr. Duque – Laura Krannawitter, advisor to Cmmr. Duque. Representatives of Southern California Gas Company (SoCalGas), Kern River Gas Transmission Company and Questar Southern Trails Pipeline Company, The Utility Reform Network, Watson Cogeneration Company, Calpine Corporation, and Southern California Generation Coalition participated in the meetings. Pocta described the proposal of ORA for a peaking rate for SoCalGas. Pocta explained that the ORA's proposal was three-part rate with a customer charge, a volumetric Interstate Transition Cost Surcharge (ITCS) cost and a residually determined demand component based on the customer default transportation rate less customer charges and ITCS. Pocta stated that ORA found the application of the peaking rate in the proposed decision (PD) to be unclear. Pocta stated further that ORA did not support aspects of the firm peaking rate in the alternate. Referring to the alternate, Pocta noted that if the Commission was inclined to adopt an interruptible peaking rate as a percentage of a default or other rate that it should be properly developed since it is likely that customers would opt for such service. Pocta expressed ORA's concern with language, incorporated into both the PD and the alternate, which forms the basis for a peaking rate.
